Yogyakarta – Indonesia

SUMMARY

Fresh graduate in Informatics from Ahmad Dahlan University (GPA 3.94/4.00) with a solid foundation across software development, database management, and data analysis. Experienced in building web applications using HTML5, CSS3, JavaScript, PHP/Laravel, and MySQL, as well as working with Python for data cleaning, exploratory analysis, and visualization. Comfortable working across the stack, from designing databases and writing back-end logic to debugging and testing for reliability. Strong problem-solving skills, attention to detail, and experience collaborating with cross-functional teams using Git & GitHub for version control. Adaptable, quick to learn new tools and technologies, and eager to grow in the IT field.

WORK EXPERIENCE

Database Laboratory Teaching Assistant *Sept 2025 – Jan 2026*

Informatics Laboratory, Universitas Ahmad Dahlan – Yogyakarta

- Mentored 40+ undergraduate students in database laboratory sessions, covering SQL, MySQL, MongoDB, database design, normalization, and query implementation.
- Assisted lecturers in preparing laboratory materials, facilitating practical classes, and evaluating student assignments.
- Supported students in troubleshooting database-related problems and improving their understanding of database concepts.

Backend Developer Intern *Aug 2025 – Dec 2025*

ASCEE (Association for Scientific Computing, Electronics, and Engineering) – Yogyakarta

- Delivered 6 pages and modules across 2 web projects (a conference website and a journal submission system) using Laravel, PHP, JavaScript, and MySQL.
- Built 3 public pages (Home, Call for Paper, Contact) with a web admin (CMS), enabling admins to update website content directly without touching code.
- Designed the MySQL database with the team and mentor and integrated it across the website, CMS, and submission modules, so content and submission statuses are synchronized in real time.
- Developed 2 role-based modules (Author and Editor) for the journal workflow: journal upload, revision, and real-time status tracking for authors; reviewer assignment with deadlines and Section Editor assignment for editors.
- Implemented a 3-outcome editorial decision feature (accept, reject, request revision) with data validation and automatic email notifications for each outcome, removing the need for manual author follow-up.
- Performed manual testing, debugging, and performance optimization before every release; collaborated with cross-functional teams using Git and GitHub for version control.

EDUCATION

Universitas Ahmad Dahlan – Yogyakarta, Indonesia *Sep 2022 – Jun 2026*

Bachelor of Informatics, GPA 3.94/4.00

- Recipient of the Kepulauan Riau Regional Scholarship (2025), awarded based on university and GPA ranking across the Kepulauan Riau region.
- Recipient of the Academic Excellence Scholarship (2023) for outstanding academic performance.
- Bachelor's thesis: "Aspect-Based Sentiment Analysis on Artificial Intelligence Topics in Education on Social Media X Using IndoBERT Labeling and LSTM Classification," which involved data collection, preprocessing, labeling, and classification analysis.
- Participated in a research project focused on developing an expression detection system for children.
- Served as a Teaching Assistant for Database (2 semesters), Artificial Intelligence, and Algorithm Strategy courses, mentoring 200+ undergraduate students during 2023–2026.

ACADEMIC PROJECTS

Backend Developer – Village Information Management System *Feb – Mar 2026*

KKN Karangtengah Village

- Built the system logic, database integration, and a content management system (CMS) covering 4 pages using Next.js and TypeScript, with PostgreSQL and a Node.js environment.
- Collaborated with the team to develop and deliver an information system tailored to the needs of Karangtengah Village.

Fullstack Developer – Web-Based Information Management System *Mar – Aug 2025*

CV Kembar Jaya

- Developed responsive web application interfaces and backend logic using HTML, CSS, JavaScript, and PHP.
- Designed and integrated a MySQL database based on the system requirements and Entity Relationship Diagram (ERD).
- Managed database integration between the user-facing website and backend system to support efficient data management.

Mobile Developer (Team Project) – City Issue Reporting App with LBS *Feb 2024*

Mobile Programming Course, UAD

- Designed and implemented the user interface using XML, including input fields and buttons, and developed application logic using Java in Android Studio.
- Implemented SQLite database integration through a DatabaseHelper class to store and manage user registration data.
- Developed input validation and email duplication checking to ensure complete and valid registration data before storing it in the database.
- Implemented user registration flow using Java, Intent, and event listeners to handle user interactions and navigation between activities.
- Contributed to a team project applying Location-Based Service (LBS) technology to enable automatic, real-time location tagging for city issue reports.

ORGANIZATIONAL EXPERIENCE

Consumption Division – Legislative Training Committee *Dec 2024*

Yogyakarta

- Coordinated meal planning and catering arrangements for 100 participants, committee members, and speakers throughout the event.
- Ensured timely and accurate meal distribution according to the event schedule and participants' requirements.
- Collaborated with vendors and organizing committees to support smooth event operations and successful program execution.

Mentor Division – Campus Orientation Program (Program Pengenalan Kampus) *Sept 2023*

Yogyakarta

- Mentored and guided 13 new students, providing direction and support throughout the 7-day orientation program.
- Coordinated with fellow mentors and the organizing committee to ensure the smooth implementation of orientation activities and schedules.
- Assisted new students in adapting to the campus environment, and providing clear information throughout the program.

CERTIFICATIONS

- Python Developer Certification – freeCodeCamp (Oct 2026)
- Data Analytics Essentials – Cisco (Aug 2026)
- JavaScript Essentials 1 – Cisco (Aug 2026)
- Guide to Learn Python with AI – DQLab (Aug 2026)
- Introduction to Data Science with Python – DQLab (Aug 2026)

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Next.js, Tailwind CSS, Responsive Web Design, Java (Android/XML)

Backend & Database: Node.js, PHP, Laravel, SQL, MySQL, PostgreSQL, MongoDB, JavaScript, RESTful API, ERD, Git & GitHub

Data & Analytics: Python, Excel, Tableau, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, Dashboard

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Communication, Teamwork & Collaboration, Leadership, Time Management, Adaptability
