SUMMARY

Bachelor's degree in Informatics from Ahmad Dahlan University with an interest in web application development as a Back-End Developer and Front-End Developer. Experienced in developing web applications through internship programs and academic projects using PHP, Laravel, MySQL, HTML, CSS, JavaScript, and Git. Skilled in feature development, database integration, and user interface implementation. Accustomed to working in teams, adapting quickly, and highly motivated to learn in order to deliver efficient, high-quality web solutions.

EDUCATION

Ahmad Dahlan University - Yogyakarta Sept 2022 – Jun 2026
Bachelor of Informatics (GPA 3.94/4.00)

- Recipient of the Academic Excellence Scholarship (2023) for outstanding academic performance.
- Participated in a research project focused on developing an expression detection system for children.

WORK EXPERIENCE

Association for Scientific Computing, Electronics, and Engineering (ASCEE) - Yogyakarta
Back-End Developer, Journal Submission System Aug 2025 - Dec 2025

- Developed Author and Editor features for the journal submission system using Laravel, PHP, and JavaScript.
- Managed and integrated a MySQL database for storing, retrieving, and processing journal data.
- Collaborated with the development team on developing, testing, and refining features to meet system requirements.

Back-End Developer, Conference Website Aug 2025 - Dec 2025

- Developed back-end features for the Home, Call for Paper, and Contact pages using Laravel, PHP, and JavaScript.
- Designed and managed a MySQL database for data storage, updates, and retrieval.
- Integrated functionality between the user website and admin website to ensure smooth content management.

Informatics Laboratory, Ahmad Dahlan University - Yogyakarta
Artificial Intelligence Teaching Assistant Apr 2025 - Aug 2025

- Developed learning materials from modules to support students' understanding of lab material.
- Mentored 25 students in conducting Artificial Intelligence lab sessions using Python.
- Explained the fundamental concepts and implementation of *Depth First Search* (DFS), *Breadth First Search* (BFS), and other algorithms through lab sessions and demonstrations.
- Evaluated lab results and managed lab assessments to support a smooth learning process.

Algorithm Strategy Teaching Assistant Apr 2025 - Aug 2025

- Mentored and guided 35 students in Algorithm Strategy lab sessions in person using C++.
- Explained the fundamental concepts and implementation of various algorithm strategies, such as *Divide and Conquer*, *Brute Force*, *Greedy*, and other algorithms.
- Evaluated lab results and managed lab assessments to support a smooth learning process.

Database Teaching Assistant Sept 2024 - Jan 2025

- Prepared and developed Database lab modules, including exercises and case studies on SQL, Entity Relationship Diagram (ERD), normalization, and other topics.
- Mentored 40 students in lab sessions by explaining database concepts and their implementation.
- Supervised and provided guidance to students throughout the lab sessions.
- Evaluated lab results and managed lab assessments to support a smooth learning process.

ACADEMIC PROJECTS

CV Kembar Jaya Information Management System Website – Klaten

Full Stack Developer

Mar 2025 - Aug 2025

- Developed the user interface for the Information Management System using HTML, CSS, PHP, and JavaScript to deliver a responsive and user-friendly experience.
- Designed and managed a MySQL database to support data storage, processing, and retrieval.
- Integrated the user website with the admin website by implementing database connections and data exchange flows.
- Collaborated with the team on developing, testing, and refining features to ensure the system met user requirements.

SKILLS

Hard Skills : Laravel, PHP, Javascript, Python, C++, MySQL, HTML, Tailwind, CSS, ERD, Git & GitHub, Figma.

Soft Skills : Communication, teamwork, time management, responsibility, adaptability, strong eagerness to learn.
